

CEDARS-SINAI®

# THE RAY CHARLES FOUNDATION SCHOLARS IN NEUROSURGERY

## Funded by The Ray Charles Foundation

Keith L. Black, MD, Chair of the Cedars-Sinai Department of Neurosurgery, is proud to announce **The Ray Charles Foundation Scholars in Neurosurgery**. This program aims to promote and enhance diversity in neurosciences for students from underrepresented backgrounds with a special focus on students from Historically Black Colleges and Universities (HBCU).

The award is available for undergraduate, graduate and medical students and will:

- Expose and allow students to actively participate in the wide array of innovative, cutting edge neurological research in our laboratories
- Facilitate the development of relationships between students, scientists and healthcare providers that will contribute to their career development and professional success.
- Gain the opportunity to submit their own work to national meetings and present if accepted
- Provide a salary that is dependent on the student's level of education, skills and research experience

### Available Areas of Research

- Nanomedicine
- Alzheimer's disease diagnostics and treatment
- Tumor immunology
- Blood-brain barrier and drug delivery
- Gene therapy and discovery
